

Cotton roller towel is made out of 100 % cotton and has high moisture absorbance capacity, removes residual dirt by rubbing and facilitates a short hand-drying duration. Blue colour linen towels are dedicated for medium dirty hands and for use in industrial washrooms.

Cotton roller towels are about 35 m long, 21 cm wide and provides up to 120 hand-drying portions. Rentex Ltd supplies freshly laundered roller towels on a regular basis to be dispensed from high-quality towel cabinets maintained by the company.

We collect used and soiled rolls for laundering to remove any stains, sanitize and prepare the towel for reuse. Cotton towels are repaired when possible or, if it is damaged pieces are replaced by new rolls.

Cotton roller towel system is a low maintenance and user-friendly, natural hand drying method. The soiled / used part of hand towel roll is kept in separate chamber and never has any contact with the clean towel.

Roller towel dispensers provide a fresh portion for each user and prevents cross contamination. The soft fabric of 100% cotton is gentle on your skin. At the same time, the absorbent cotton deeply purifies skin pores and rub off dirt residue. It makes this personal comfort and convenience possible in every public washroom.
